## EXPLANATORY NOTES

1. In all the tables of imports in this Report, the quantities and values are based upon the declarations of importers (import entries), as subsequently checked by Customs officials.
2. Weight, where shown is the net weight of the goods, that is, it excludes the weight of the covers or receptacles, except in cases of certain goods, as provided in the Customs Tariff.
3. The expression "ton" means 2,000 pounds, and "cwt." 100 pounds, avoirdupois. Where other units of quantity are used, Imperial standards apply.
4. In this Report are trade items such as "Engines, gas, n.o.p., and parts", which show both quantities and values. In the item "Engines, gas, n.o.p., and parts", the quantity represents the number of complete gas engines only, while the value represents not only the value of the specified number of complete gas engines but also the value of all kinds of "Parts" of gas engines; therefore, in this item, and in similar items, the average value per unit cannot be ascertained.
5. "Imports" means "Imports entered for Consumption". "Entered for Consumption" does not imply that the goods have been actually consumed in Canada, but that they have passed into the custody of the importer and that duty has been paid on the dutiable portion.
6. For statistical purposes, the value of merchandise imported, as shown in this Report, is the value as determined for Customs duty purposes. In most cases, this would be the invoice value of the goods converted to Canadian dollars at authorized exchange ratios. The value does not include charges such as freight, insurance, handling, duties or taxes.
7. Imports into Canada are classified as received from the countries whence they were consigned to Canada. The countries of consignment are the countries from which the goods have come, without interruption of transit, except in the course of transshipment or transfer from one conveyance to another. The countries whence goods are consigned are not necessarily the countries of actual origin, since goods produced in one country may be purchased by a firm in another country and thence despatched, after a longer or shorter interval, to Canada. In such cases the second country would be the country of consignment to which the goods would be credited. An example is the case of tea grown in the Orient but purchased in the bonded market in London, England; Canadian statistics record such imports as coming from the United Kingdom.
8. The initials "N.O.P." mean "not otherwise provided for".
9. Some of the descriptions of articles used in this Report are abbreviated and incomplete due to lack of space and mechanical limitations. Full descriptions are shown in the annual printed report of the Trade of Canada.
10. Throughout this Report, figures are subject to revision.
11. The Foreign Trade of Newfoundland is included as from April 1, 1949.

The following table sets out index number comparisons of the nominal (or declared) values of imports into Canada for consumption together with their respective price and volume components for a current month.(1) The price indexes are of the base-weighted aggregative type and are interim measurements developed as deflators of the value series.(2) The physical volume indexes are quotients of a division of value indexes by corresponding price indexes. They are currently weighted.

The price indexes utilized as "deflators" of the value indexes differ slightly from the conventional trade statistics in their grouping, though arranged by nature of component material. Adjustments to groups are determined by pricing problems. Declared value indexes and physical volume indexes have been grouped, consequently, according to the price index sample.

The groups usually designated in the trade statistics as agricultural and vegetable products and animals and animal products have, in this format, been combined into Group I, agricultural and other primary products, with a sub-group of rubber and its products transferred to the miscellaneous group. Imports of foreign built ships have been transferred from the miscellaneous group to iron and steel and their products; phosphate rock has been transferred from non-metallic minerals to fertilizer; advertising matter has been subtracted from wood products and paper and added to the miscellaneous special and non-commercial transactions; and certain other minor group adjustments have been made. Totals exclude-in common with other statistics of imports into Canada for consumption-temporary imports for exhibition or competition, monetary and non-monetary gold; and include Newfoundland as a tenth Canadian province from April 1, 1949. Imports into Canada for the use of the United Kingdom government have been deducted from the total imports for consumption for the purpose of these index number comparisons because of their special relationship to the Canadian trade content.(3)

A sub-division of the miscellaneous group, termed special and non-commercial transactions, is designed to distinguish unilateral transactions-such as charitable donations, bequests, etc. - and transactions with mixed financial elements from the ordinary trade content. The double character of the miscellaneous group of trade transactions is thus emphasized. Special and non-commercial imports concerned are as follows: settlers' effects; effects left by bequest; charitable donations; casual donations; presentations for lifesaving; articles for the use of the Governor General; articles for the use of representatives of commonwealth and foreign governments; incidental purchases by Canadians returning from other countries; cinematograph film positives; advertising and printed matter.

- (1) For a condensed post-war record by months see "Trade of Canada, Imports; January, 1951"; D.B.S. 10-4030, Vol. 8, No. 1.
- (2) See "Export and Import Price Indexes by Months, July, 1945 - June, 1950 (1948=100)"; D.B.S., Ottawa, October, 1950 (Reference Paper No. 8)
- (3) These imports on United Kingdom Government account may be described as non-commercial import transactions also.

## EXPLANATORY NOTES

1. In all the tables of imports in this Report, the quantities and values are based upon the declarations of importers (import entries), as subsequently checked by Customs officials.
2. Weight, where shown is the net weight of the goods, that is, it excludes the weight of the covers or receptacles, except in cases of certain goods, as provided in the Customs Tariff.
3. The expression "ton" means 2,000 pounds, and "cwt." 100 pounds, avoirdupois. Where other units of quantity are used, Imperial standards apply.
4. In this Report are trade items such as "Engines, gas, n.o.p., and parts", which show both quantities and values. In the item "Engines, gas, n.o.p., and parts", the quantity represents the number of complete gas engines only, while the value represents not only the value of the specified number of complete gas engines but also the value of all kinds of "Parts" of gas engines; therefore, in this item, and in similar items, the average value per unit cannot be ascertained.
5. "Imports" means "Imports entered for Consumption". "Entered for Consumption" does not imply that the goods have been actually consumed in Canada, but that they have passed into the custody of the importer and that duty has been paid on the dutiable portion.
6. For statistical purposes, the value of merchandise imported, as shown in this Report, is the value as determined for Customs duty purposes. In most cases, this would be the invoice value of the goods converted to Canadian dollars at authorized exchange ratios. The value does not include charges such as freight, insurance, handling, duties or taxes.
7. Imports into Canada are classified as received from the countries whence they were consigned to Canada. The countries of consignment are the countries from which the goods have come, without interruption of transit, except in the course of transshipment or transfer from one conveyance to another. The countries whence goods are consigned are not necessarily the countries of actual origin, since goods produced in one country may be purchased by a firm in another country and thence despatched, after a longer or shorter interval, to Canada. In such cases the second country would be the country of consignment to which the goods would be credited. An example is the case of tea grown in the Orient but purchased in the bonded market in London, England; Canadian statistics record such imports as coming from the United Kingdom.
8. The initials "N.O.P." mean "not otherwise provided for".
9. Some of the descriptions of articles used in this Report are abbreviated and incomplete due to lack of space and mechanical limitations. Full descriptions are shown in the annual printed report of the Trade of Canada.
10. Throughout this Report, figures are subject to revision.
11. The Foreign Trade of Newfoundland is included as from April 1, 1949.

The following table sets out index number comparisons of the nominal (or declared) values of imports into Canada for consumption together with their respective price and volume components for a current month.(1) The price indexes are of the base-weighted aggregative type and are interim measurements developed as deflators of the value series.(2) The physical volume indexes are quotients of a division of value indexes by corresponding price indexes. They are currently weighted.

The price indexes utilized as "deflators" of the value indexes differ slightly from the conventional trade statistics in their grouping, though arranged by nature of component material. Adjustments to groups are determined by pricing problems. Declared value indexes and physical volume indexes have been grouped, consequently, according to the price index sample.

The groups usually designated in the trade statistics as agricultural and vegetable products and animals and animal products have, in this format, been combined into Group I, agricultural and other primary products, with a sub-group of rubber and its products transferred to the miscellaneous group. Imports of foreign built ships have been transferred from the miscellaneous group to iron and steel and their products; phosphate rock has been transferred from non-metallic minerals to fertilizer; advertising matter has been subtracted from wood products and paper and added to the miscellaneous special and non-commercial transactions; and certain other minor group adjustments have been made. Totals exclude-in common with other statistics of imports into Canada for consumption-temporary imports for exhibition or competition, monetary and non-monetary gold; and include Newfoundland as a tenth Canadian province from April 1, 1949. Imports into Canada for the use of the United Kingdom government have been deducted from the total imports for consumption for the purpose of these index number comparisons because of their special relationship to the Canadian trade content.(3)

A sub-division of the miscellaneous group, termed special and non-commercial transactions, is designed to distinguish unilateral transactions-such as charitable donations, bequests, etc. - and transactions with mixed financial elements from the ordinary trade content. The double character of the miscellaneous group of trade transactions is thus emphasized. Special and non-commercial imports concerned are as follows: settlers' effects; effects left by bequest; charitable donations; casual donations; presentations for lifesaving; articles for the use of the Governor General; articles for the use of representatives of commonwealth and foreign governments; incidental purchases by Canadians returning from other countries; cinematograph film positives; advertising and printed matter.

- (1) For a condensed post-war record by months see "Trade of Canada, Imports; January, 1951"; D.B.S. 10-4030, Vol. 8, No. 1.
  - (2) See "Export and Import Price Indexes by Months, July, 1945 - June, 1950 (1948=100)"; D.B.S., Ottawa, October, 1950 (Reference Paper No. 8)
  - (3) These imports on United Kingdom Government account may be described as non-commercial import transactions also.

## EXPLANATORY NOTES

1. In all the tables of imports in this Report, the quantities and values are based upon the declarations of importers (import entries), as subsequently checked by Customs officials.
2. Weight, where shown is the net weight of the goods, that is, it excludes the weight of the covers or receptacles, except in cases of certain goods, as provided in the Customs Tariff.
3. The expression "ton" means 2,000 pounds, and "cwt." 100 pounds, avoirdupois. Where other units of quantity are used, Imperial standards apply.
4. In this Report are trade items such as "Engines, gas, n.o.p., and parts", which show both quantities and values. In the item "Engines, gas, n.o.p., and parts", the quantity represents the number of complete gas engines only, while the value represents not only the value of the specified number of complete gas engines but also the value of all kinds of "Parts" of gas engines; therefore, in this item, and in similar items, the average value per unit cannot be ascertained.
5. "Imports" means "Imports entered for Consumption". "Entered for Consumption" does not imply that the goods have been actually consumed in Canada, but that they have passed into the custody of the importer and that duty has been paid on the dutiable portion.
6. For statistical purposes, the value of merchandise imported, as shown in this Report, is the value as determined for Customs duty purposes. In most cases, this would be the invoice value of the goods converted to Canadian dollars at authorized exchange ratios. The value does not include charges such as freight, insurance, handling, duties or taxes.
7. Imports into Canada are classified as received from the countries whence they were consigned to Canada. The countries of consignment are the countries from which the goods have come, without interruption of transit, except in the course of transshipment or transfer from one conveyance to another. The countries whence goods are consigned are not necessarily the countries of actual origin, since goods produced in one country may be purchased by a firm in another country and thence despatched, after a longer or shorter interval, to Canada. In such cases the second country would be the country of consignment to which the goods would be credited. An example is the case of tea grown in the Orient but purchased in the bonded market in London, England; Canadian statistics record such imports as coming from the United Kingdom.
8. The initials "N.O.P." mean "not otherwise provided for".
9. Some of the descriptions of articles used in this Report are abbreviated and incomplete due to lack of space and mechanical limitations. Full descriptions are shown in the annual printed report of the Trade of Canada.
10. Throughout this Report, figures are subject to revision.
11. The Foreign Trade of Newfoundland is included as from April 1, 1949.

The following table sets out index number comparisons of the nominal (or declared) values of imports into Canada for consumption together with their respective price and volume components for a current month.(1) The price indexes are of the base-weighted aggregative type and are interim measurements developed as deflators of the value series.(2) The physical volume indexes are quotients of a division of value indexes by corresponding price indexes. They are currently weighted.

The price indexes utilized as "deflators" of the value indexes differ slightly from the conventional trade statistics in their grouping, though arranged by nature of component material. Adjustments to groups are determined by pricing problems. Declared value indexes and physical volume indexes have been grouped, consequently, according to the price index sample.

The groups usually designated in the trade statistics as agricultural and vegetable products and animals and animal products have, in this format, been combined into Group I, agricultural and other primary products, with a sub-group of rubber and its products transferred to the miscellaneous group. Imports of foreign built ships have been transferred from the miscellaneous group to iron and steel and their products; phosphate rock has been transferred from non-metallic minerals to fertilizer; advertising matter has been subtracted from wood products and paper and added to the miscellaneous special and non-commercial transactions; and certain other minor group adjustments have been made. Totals exclude-in common with other statistics of imports into Canada for consumption-temporary imports for exhibition or competition, monetary and non-monetary gold; and include Newfoundland as a tenth Canadian province from April 1, 1949. Imports into Canada for the use of the United Kingdom government have been deducted from the total imports for consumption for the purpose of these index number comparisons because of their special relationship to the Canadian trade content.(3)

A sub-division of the miscellaneous group, termed special and non-commercial transactions, is designed to distinguish unilateral transactions-such as charitable donations, bequests, etc. - and transactions with mixed financial elements from the ordinary trade content. The double character of the miscellaneous group of trade transactions is thus emphasized. Special and non-commercial imports concerned are as follows: settlers' effects; effects left by bequest; charitable donations; casual donations; presentations for lifesaving; articles for the use of the Governor General; articles for the use of representatives of commonwealth and foreign governments; incidental purchases by Canadians returning from other countries; cinematograph film positives; advertising and printed matter.

- (1) For a condensed post-war record by months see "Trade of Canada, Imports; January, 1951"; D.B.S. 10-4030, Vol. 8, No. 1.
- (2) See "Export and Import Price Indexes by Months, July, 1945 - June, 1950 (1948=100)"; D.B.S., Ottawa, October, 1950 (Reference Paper No. 8)
- (3) These imports on United Kingdom Government account may be described as non-commercial import transactions also.

## EXPLANATORY NOTES

1. In all the tables of imports in this Report, the quantities and values are based upon the declarations of importers (import entries), as subsequently checked by Customs officials.
2. Weight, where shown is the net weight of the goods, that is, it excludes the weight of the covers or receptacles, except in cases of certain goods, as provided in the Customs Tariff.
3. The expression "ton" means 2,000 pounds, and "cwt." 100 pounds, avoirdupois. Where other units of quantity are used, Imperial standards apply.
4. In this Report are trade items such as "Engines, gas, n.o.p., and parts", which show both quantities and values. In the item "Engines, gas, n.o.p., and parts", the quantity represents the number of complete gas engines only, while the value represents not only the value of the specified number of complete gas engines but also the value of all kinds of "Parts" of gas engines; therefore, in this item, and in similar items, the average value per unit cannot be ascertained.
5. "Imports" means "Imports entered for Consumption". "Entered for Consumption" does not imply that the goods have been actually consumed in Canada, but that they have passed into the custody of the importer and that duty has been paid on the dutiable portion.
6. For statistical purposes, the value of merchandise imported, as shown in this Report, is the value as determined for Customs duty purposes. In most cases, this would be the invoice value of the goods converted to Canadian dollars at authorized exchange ratios. The value does not include charges such as freight, insurance, handling, duties or taxes.
7. Imports into Canada are classified as received from the countries whence they were consigned to Canada. The countries of consignment are the countries from which the goods have come, without interruption of transit, except in the course of transshipment or transfer from one conveyance to another. The countries whence goods are consigned are not necessarily the countries of actual origin, since goods produced in one country may be purchased by a firm in another country and thence despatched, after a longer or shorter interval, to Canada. In such cases the second country would be the country of consignment to which the goods would be credited. An example is the case of tea grown in the Orient but purchased in the bonded market in London, England; Canadian statistics record such imports as coming from the United Kingdom.
8. The initials "N.O.P." mean "not otherwise provided for".
9. Some of the descriptions of articles used in this Report are abbreviated and incomplete due to lack of space and mechanical limitations. Full descriptions are shown in the annual printed report of the Trade of Canada.
10. Throughout this Report, figures are subject to revision.
11. The Foreign Trade of Newfoundland is included as from April 1, 1949.

The following table sets out index number comparisons of the nominal (or declared) values of imports into Canada for consumption together with their respective price and volume components for a current month.(1) The price indexes are of the base-weighted aggregative type and are interim measurements developed as deflators of the value series.(2) The physical volume indexes are quotients of a division of value indexes by corresponding price indexes. They are currently weighted.

The price indexes utilized as "deflators" of the value indexes differ slightly from the conventional trade statistics in their grouping, though arranged by nature of component material. Adjustments to groups are determined by pricing problems. Declared value indexes and physical volume indexes have been grouped, consequently, according to the price index sample.

The groups usually designated in the trade statistics as agricultural and vegetable products and animals and animal products have, in this format, been combined into Group I, agricultural and other primary products, with a sub-group of rubber and its products transferred to the miscellaneous group. Imports of foreign built ships have been transferred from the miscellaneous group to iron and steel and their products; phosphate rock has been transferred from non-metallic minerals to fertilizer; advertising matter has been subtracted from wood products and paper and added to the miscellaneous special and non-commercial transactions; and certain other minor group adjustments have been made. Totals exclude-in common with other statistics of imports into Canada for consumption-temporary imports for exhibition or competition, monetary and non-monetary gold; and include Newfoundland as a tenth Canadian province from April 1, 1949. Imports into Canada for the use of the United Kingdom government have been deducted from the total imports for consumption for the purpose of these index number comparisons because of their special relationship to the Canadian trade content.(3)

A sub-division of the miscellaneous group, termed special and non-commercial transactions, is designed to distinguish unilateral transactions-such as charitable donations, bequests, etc. - and transactions with mixed financial elements from the ordinary trade content. The double character of the miscellaneous group of trade transactions is thus emphasized. Special and non-commercial imports concerned are as follows: settlers' effects; effects left by bequest; charitable donations; casual donations; presentations for lifesaving; articles for the use of the Governor General; articles for the use of representatives of commonwealth and foreign governments; incidental purchases by Canadians returning from other countries; cinematograph film positives; advertising and printed matter.
